

What is claimed is:

1. A backrest comprising:

an endless main frame including a groove defined in a side thereof
and extending along an entire length thereof, the groove being delimited by
5 a bottom wall and an inner peripheral wall having an endless end face;

a mesh fixed to the endless end face of the inner peripheral wall
delimiting the groove;

a decorative frame mounted to the side of the endless main frame
and covering the groove and the endless end face of the main frame; and

10 a covering member covering the decorative frame.

2. The backrest as claimed in claim 1, wherein the bottom wall delimiting the
groove has a plurality of fixing holes defined therein, the decorative frame
having a plurality of holes, with a plurality of fasteners respectively
extending through the holes of the decorative frame and the fixing holes of
15 the bottom wall delimiting the groove.
